Cole C. Monnahan

Contact Information

Email: *monnahc@uw.edu*
Website: *colemonnahan.github.io*
Address: FSH 214, University of Washington, Seattle, WA 98195, USA

Research Interests

Marine resource management, quantitative fisheries science, simulation testing, Bayesian statistics, population dynamics.

Education

University of Washington (UW), Seattle, Washington, USA

Ph.D., Quantitative Ecology and Resource Management, 2017

- Thesis Topic: *Advancing Bayesian methods for fisheries stock assessment*
- Advisor: Dr. Trevor Branch

M.S., Quantitative Ecology and Resource Management, 2013

- Thesis Topic: *Population trends of the eastern North Pacific blue bhale*
- Advisor: Dr. Trevor Branch

Western Washington University, Bellingham, Washington, USA

B.S., Mathematics, 2006
B.A., German Language, 2006
AHA Study Abroad Program, Cologne, Germany, 2004

Computer Skills

Software: R, ADMB, TMB, Stan, JAGS, Stock Synthesis, LaTeX, git, MS Office.
Data Analysis: Developing, fitting, and diagnosing linear, non-linear, GLM, GAM and hierarchical models in frequentist and Bayesian paradigms.
R Packages: `ss3sim` (developer), `r4ss` (contributor), `TMB` (contributor).

Scholarships and Awards

2013 National Marine Fisheries Service/Washington Sea Grant Fellowship in Population Dynamics: *Optimizing Bayesian analysis in data-rich stock assessments and management resources in data-limited fisheries.*

2010 Graduate School Fund for Excellence and Innovation Top Scholar Award, UW

Professional Experience

U.S. Department of Agriculture, Bothell, Washington, USA
Agricultural Statistician **2006 – 2010**
Mathematical/statistical analysis and advice, improvement of current instrumentation procedures in dairy science. Supervisor: Dr. John Priest.

Teaching Experience

Guest Lectures

Mixed effects models
- StatR 201: Data Modeling and Analysis with R. **2015**

Nonlinear function minimization.
- FISH 458: Modeling and Estimation in Conservation & Resource Management **2015**

Object-oriented programming in R: S3, S4, and reference classes.
- FISH 512: Super-Advanced R Programming. **2014**

Non-parametric, additive, and generalized additive models.
- QERM 514: Analysis of Ecological and Environmental Data **2013 & 2014**

Teacher's Assistant

Converted computer labs in Excel to R, helped run labs, and graded homework.
- FISH 458: Modeling and Estimation in Conservation & Resource Management **2012**

Prepared and led weekly R computer labs.
- QERM 514: Analysis of Ecological and Environmental Data **2012 & 2014**

Presentations

UW School of Aquatic and Fisheries Science: Quantitative Seminar

- *Advantages of gradient-based MCMC algorithms for difficult-to-fit Bayesian models in fisheries and ecology.* 2015
- *Splitting historical blue whale catches using spatial GAMs.* 2012

Scientific Committee of the International Whaling Commission

- Invited speaker. *Sensitivity analyses for the eastern North Pacific blue whale assessment* (SC/66a/IA/15). 2015.

CAPAM Workshop on Growth, La Jolla, CA, USA

- *An evaluation of alternative binning approaches for composition data in integrated stock assessments.* 2014.

National Marine Mammal Laboratory (NOAA), Seattle, WA, USA

- *Do ship strikes threaten the recovery of endangered eastern North Pacific blue whales?* 2014.

UW School of Aquatic and Fisheries Science: Fisheries Think Tank

- `ss3sim`: *An R package for stock assessment simulation with SS3.* 2014.
- *Next-generation MCMC: theory, options, and practice for Bayesian inference in ADMB.* 2013. With Drs. Jim Thorson and Ian Taylor.
